Task 1.1

Task 1.2

Womp womp

You've successfully created a project with
Vite + **Vue 3**.

Yujie Hu

Documentation

Vue's [official documentation](#) provides you with all information you need to get started.

Tooling

This project is served and bundled with **Vite**. The recommended IDE setup is **VSCode** + **Volar**. If you need to test your components and web pages, check out **Cypress** and **Cypress Component Testing**. More instructions are available in **README.md**.

Ecosystem

Get official tools and libraries for your project: **Pinia**, **Vue Router**, **Vue Test Utils**, and **Vue Dev Tools**. If you need more resources, we suggest paying **Awesome Vue** a visit.

Community

Got stuck? Ask your question on **Vue Land**, our official Discord server, or **StackOverflow**. You should also subscribe to **our mailing list** and follow the official **@vuejs** twitter account for latest news in the Vue world.

Support Vue

As an independent project, Vue relies on community backing for its sustainability. You can help us by [becoming a sponsor](#).
